

Temp-Chex Digital

Thermometer unit for accurate monitoring of temperatures.

NIST/DKD Traceable

Each thermometer is accompanied by a serial number and is NIST (National Institute of Standards and Technology) and DKD (Deutscher Kalibrierdienst) traceable which allows your laboratory to meet standards established by CAP (College of American Pathologists). A free wall chart for daily temperature recording is included with each Temp-Chex Digital.

Accurate

Temp-Chex Digital thermometers are easy-to-read and are accurate to within $\pm 1^{\circ}\text{C}$ from -50° to 120°C , $\pm 2^{\circ}\text{C}$ from 120° to 150°C and $\pm 4^{\circ}\text{C}$ from 150° to 200°C . The Temp-Chex Digital thermometer probe is inserted in a vial of glass beads, so readings will not fluctuate with the opening and closing of doors. This results in a more accurate reading.

Safe & Reliable

Temp-Chex Digital thermometers are a safe alternative to mercury thermometers. No toxic or flammable chemicals are used and no expensive clean-up kits or disposal services are needed. Temp-Chex Digital is built to withstand harsh environments and will perform optimally for many years. The wide temperature range makes it suitable for multiple applications. You can depend on Streck Temp-Chex Digital to provide an accurate reading.

As mandated by CAP¹, CLIA² and JCAHO, laboratories and healthcare organizations are required to monitor actual readings of temperature-controlled spaces, equipment and instruments.

Streck offers Temp-Chex Digital, a dual scale digital thermometer that is certified NIST traceable.

Features Include:

Measurement Range

- -50° to 200°C
- Options for Celsius or Fahrenheit
- Probe is immersed in vial of glass beads which acts as a temperature buffer
- Display unit can be mounted magnetically, adhesively, by keyhole or flip-out desk stand, inside or outside of temperature-controlled area

Continuous Display

- Easy-to-read digital display
- Records minimum/maximum temperatures
- Only requires one AAA battery (included)

NIST/DKD Traceable

- Meets CAP standards
- Accurate to within $\pm 1^{\circ}\text{C}$ at temperatures from -50° to 120°C , $\pm 2^{\circ}\text{C}$ at temperatures from 120°C to 150°C and $\pm 4^{\circ}\text{C}$ at temperatures from 150°C to 200°C

	Range	Catalog #
Temp-Chex Digital	-50° to 200°C	240056

Streck offers a complete line of mercury-free Temp-Chex thermometers for laboratory use. Streck's Temp-Chex line also includes the Temp-Chex Enviro-Safe[®] thermometer models, which utilize biodegradable, nontoxic and nonflammable components and Temp-Chex Red Spirit models, mercury-free thermometers for monitoring temperatures in standard and ultra-low freezers, refrigerators, incubators and at room temperature.
