

PVS

Pipet Verification Service

The **quick and easy** way to verify the calibration of you laboratory's pipets.

Why So Many Labs Choose PVS

- Pipets never leave the lab
- Ensures regulatory compliance
- Quick turnaround time
- Use with any pipet brand, 10µl to 5ml

Easy 3 Step Process

1. Place order for one PVS kit per pipet to be tested.
2. Once a kit is received, pipet the supplied Pipetting Solution into each of the six Receiver Solution vials and send back to Streck in the original box postage paid.
3. Streck verifies the pipet's accuracy, reproducibility, calculates the mean volume delivered, standard deviation, coefficient of variation, and percent recovered. Within 48 hours of receipt at Streck, your PVS report is e-mailed or faxed and then mailed to your laboratory for record keeping and inspections.

"I like the ease with which I receive and order the pipette verification material. I also like that I can call with any questions, get a report faxed immediately, and then get a hard copy sent in the mail. Streck helps me have one less hassle as a laboratory manager. Thanks for simplifying this needed service!"

- Laboratory Manager (Florida)
