Streck-MiniPack™ 15L reagent package designed for Coulter® AC•T diff™ and AC•T diff2™ analyzers

Omaha, NE — Streck has announced the immediate availability of its new Streck-MiniPack 15L reagent package for high volume laboratories using AC•T diff analyzers.

The Streck-MiniPack 15L contains 15L of Diluent, 500mL of lysing agent and a reagent management card. Streck-Kleen enzymatic cleaner is available separately for the daily removal of protein buildup.

The introduction of this product completes the Streck product line for AC•T diff series analyzers. Streck offers Para 12® hematology control, Cal-Chex calibrator and CVA for linearity assessment. Customers save by purchasing the complete package through Streck.

Streck also offers the Streck-MiniPack (4L) configuration which contains 4L of diluent, 250mL of lysing agent, 250mL of Streck-Kleen and a reagent management card. The 4L MiniPack is designed to fit conveniently into the instrument's reagent compartment and is configured for optimal usage and therefore, reduced waste.

Over the past 30 years, Streck has developed a reputation for excellence that includes consistent, high quality products and responsive customer service and technical service teams. For more information, call 800-843-0912 or consult Streck online at www.streck.com.
